

Xtrackers II EUR Covered Bond Swap UCITS ETF

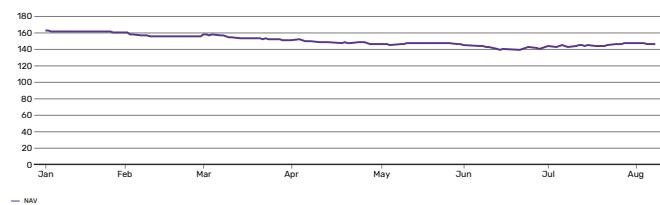

The aim is for your investment to reflect the performance of the MARKIT IBOXX EUR LIQUID COVERED INDEX® (Index). The Index reflects certain types of tradeable debt (bonds) denominated in Euros considered less likely to default (investment grade) and which are issued by a credit institution with its registered office in the European Union governed by rules designed to protect bond-holders (covered bonds) or are considered by the market to be covered bonds. T-Bills and other money market instruments are not eligible. The Index will be rebalanced monthly. For bonds to be included, they must, on the relevant rebalancing date, have a remaining time of maturity of at least three years. The bonds must have a fixed rate of interest and must be part of an issue of debt which has at least €1 billion outstanding. Eligible bonds must have an age no greater than two years. The minimum size of the Index is 50 bonds and there is no maximum size. If there are less than 50 eligible bonds the maximum age rule and minimum time to maturity rule may be relaxed. The Index is sponsored by Markit Indices Limited. The Index is calculated on a total return basis which means that payments from coupons from bonds are reinvested in the Index. To achieve this aim, the Fund will buy bonds and/or invest in cash deposits and enter into financial contract(s) (derivative(s)) with Deutsche Bank relating to the bonds/deposits and the Index, in order to obtain the return on the Index. No dividends will be paid on your shares. You may redeem your investment on demand on a daily basis.

Key Information

Name	Xtrackers II EUR Covered Bond Swap UCITS ETF
Provider	Xtrackers
Trading Currency	EUR
Fund Currency	EUR
Operating MIC	XETR
Index Name	iBoxx® EUR Liquid Covered Index
