

Xtrackers DAX Income UCITS ETF

The aim is for your investment to reflect the performance of the DAX® Index (Index) which is designed to reflect the performance of the shares of 30 of the largest and most actively traded companies on the Frankfurt Stock Exchange. To be included in the Index, a company's readily available shares must be continuously traded and represent at least 10% of all readily available shares on the stock exchange. The Index is weighted in favour of larger companies. Only companies based in Germany are included in the Index but the companies can come from any business sector. The Index is reviewed and rebalanced at least quarterly. At each review, the combined value of a company's readily available shares cannot exceed 10% of the combined value of the shares of all companies comprising the Index. The Index is a price return Index. This means that the level of the Index does not include any dividends and distributions made by the companies. To achieve the aim, the Fund will attempt to replicate the Index by buying all (or, on an exceptional basis, a substantial number of) the shares in the Index in the same proportion as they have in the Index as determined by the Sub-Portfolio Manager of the Fund which is Deutsche Asset Management (UK) Limited. The Fund may receive income in respect of the securities held by the fund. The Fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of derivatives. The Fund may also engage in secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the Fund. Dividends may be paid on your shares up to four times per annum. You may redeem your shares on demand on a daily basis.
