

Xtrackers II Global Inflation-Linked Bond UCITS ETF

The aim is for your investment to reflect the performance of the Bloomberg Barclays World Government Inflation-Linked Bond Index (Index). The Index aims to reflect the performance of inflation-linked tradable debt (bonds) issued by governments from certain developed markets. To be included in the Index, the bonds must be i) issued by governments of developed market countries in the following regions: America, Europe and Asia-Pacific and ii) deemed investment grade by major rating agencies. Certain other selection criteria may also be considered such as minimum issue size, time to maturity and market size. The Index is calculated on a total return basis, which means that amounts equivalent to interest payments are reinvested in the Index. The Index is sponsored by Bloomberg Barclays Indices and reviewed and rebalanced monthly. To achieve the aim, the Fund will attempt to replicate the Index by buying a portfolio of securities that may comprise the constituents of the Index or other unrelated investments as determined by the investment manager and the sub-portfolio manager, which are DWS Group entities. The Fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of financial contracts (derivatives). The Fund may also engage in secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the Fund. No dividends will be paid on your shares. You may redeem your investment on demand on a daily basis.

Key Information
