

# Xtrackers II iBoxx Germany Covered Bond Swap UCITS ETF

The aim is for your investment to reflect the performance of the IBOXX € GERMANY COVERED® index (Index). The Index reflects certain types of tradeable debt (bonds) denominated in Euro or pre-Euro currencies issued by German entities which are governed by rules designed to protect bondholders (covered bonds). The composition of the Index is rebalanced according to a pre-set methodology. For bonds to be included in the Index on a monthly rebalancing date, they must, on the relevant rebalancing date, have a remaining time to maturity of at least one year. The bonds must have a fixed rate of interest and must be part of an issue of debt which has at least €1 billion outstanding. The Index is calculated on a total return basis which means that amounts equivalent to interest payments on the bonds are reinvested in the Index. The Index is sponsored by Markit Indices Limited and reviewed and rebalanced monthly. To achieve the aim, the Fund will buy bonds and/or invest in cash deposits and enter into financial contract(s) (derivative(s)) with Deutsche Bank relating to the bonds/deposits and the Index, in order to obtain the return on the Index. Dividends may be paid on your shares on an annual basis. You may redeem your investment on demand on a daily basis.
