

Xtrackers MSCI EMU UCITS ETF

The aim is for your investment to track the performance of the MSCI EMU Index (Index), while seeking to minimise foreign currency fluctuations at share class level. The Index is designed to reflect the performance of the stock markets of 10 countries within the European Economic and Monetary Union, namely, Austria, Belgium, Finland, France, Germany, Ireland, Italy, the Netherlands, Portugal and Spain. A company's weighting in the Index depends on the relative size of the stock market on which it is traded. The Index is calculated on a total return net basis which means that all dividends and distributions by the companies are reinvested in the shares after tax. The Index is reviewed and rebalanced at least quarterly. To achieve the aim, the Fund will attempt to replicate the Index by (i) buying all (or, on an exceptional basis, a substantial number of) the constituents of the Index in the same proportion as in the Index as determined by the Sub-Portfolio Manager of the Fund which is Deutsche Asset Management (UK) Limited and (ii) entering into financial contracts (derivatives) to attempt to reduce the effect of exchange rate fluctuations between the currency of the index components and the currency of your shares. The Fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of derivatives. The Fund may also engage in secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the Fund. No dividends will be paid on your shares. You may redeem your shares on demand on a daily basis.
